Honors Were Even in School Literary Debate

The School Literary Society held its monthly meeting on Friday afternoon in the school. The chair was taken by Madeline Otto, president of the Society.

The minutes of the last meeting having been read by the secretary, Gladys Wright, and approved, the following program was presented:

Monologue, Mabel Gilbertson, Song, five girls.

Recitation, Lyle Milligan.

Piano solo, Leonard Youell.

Collection of jokes, read by Geneva Johnstone.

Recitation, Doris Marcy.

Debate, "Resolved that smoking should be prohibited in Canada". The affirmative was taken by Florence Connell and Leonard Youell, and the negative by Betty Milligan and Eddie Bredin. Both sides put up a good argument and the judges awarded equal points. Florence Connell, for the affirmative, made a nice appearance on the platform and presented her facts in a very convincing way. Leonard Youell also scored some good points. But—their arguments leaned too much towards the evil effects of tobacco on the young—which no one doubts, and their deductions of all the dire effects resulting from the use of tobacco were very drastic. Eddie Bredin and Betty Milligan, for the negative, also made some excellent points: the soothing effect of tobacco, such legislation would be against the liberty of the subject, the growth of tobacco and its manufacture required many workmen who would thus be thrown out of employment, the moderate use of tobacco was not harmful, indeed smokers were more immune from disease than non-smokers, etc. The debate was quite interesting and very well handled considering the youth and inexperience of the debaters. Such an experience is a good training for the young people, and we hope there will be a debate again at some future date. More of the general public ought to come to these meetings.

U.F.A. Enthusiast Pleads for Increased Membership

Chinook, February 4, 1930.
Editor The Advance.

The writer, through the valued medium of your paper, would at this time like to appeal to the farmers of the Chinook district to join the U.F.A. Owing to a large deficit in the finances of the past year, it will not be possible for the directors to do much organization work; therefore, it will be the duty of the various locals to increase their membership.

The question often asked by farmers, "What has the U.F.A. done for me?" will not take much space to answer. In the formation of the Wheat and other pools, by the stand taken by the U.F.A. members in the Dominion Parliament in regard to the freight rates on grain, etc. (included in the Crowsnest Pass Agreement), in changing the personnel of the Board of Grain Commissioners and more uniform grading of wheat, thousands of dollars have been put in the pockets of the farmers of this district. There are yet a great many problems to be solved in regard to the farmers' economic conditions, and the only way to accomplish this, is by every farmer joining the U.F.A., and the best way to pay the dues, is by signing a requisition form and the Wheat Pool will pay them for the next five years. So let us all do our share in improving the farmers' standard of living and in making this province a better place in which to live.

U.F.A. MEMBER.

Important Pool Meeting

The public are invited to a meeting in the interests of the Alberta Wheat Pool, to be held in Chinook School Hall on Friday, February 7, 1930, at 3 p.m., when Norman Stewart, delegate to the Pool convention, will give his report. George Chard, of the Field Service Department, and R. A. MacPherson, Director of the Pool, will also speak.

Legislature Formally Opened

Before one of the most brilliant gatherings in the history of the province, to which flowers, bright lights, military dress and beautiful gowns lent their color, His Honor Lieutenant Governor Egbert on Thursday afternoon, January 30, at 3 p.m., formally opened the legislature.

The full ceremony of the occasion was observed with all its colorful and impressive details. An hour before the hour the main floor of the parliament building was crowded with people eager for a glimpse of the spectacle. Hundreds lined the roadway or watched from the balconies of the building. At a few minutes before 3 a large detachment of the Canadian Officers Training Corps marched to its post in front of the entrance—the official guard of honor. At 10 minutes of 3 the first round of the salute thundered out. His Honor was given 15 guns, the official salute for the Lieutenant-Governor. A splendid detachment of the Alberta Provincial Police took its station at the doorway.

Promptly on the hour the car of His Honor appeared. Accompanied by a flashing troop of

gram of more than ordinary interest.

The big question and the first that will be legislated on is the transfer of natural resources. The agreement has been completed but ratification is now necessary. Simultaneous legislation by the provincial and federal parliaments, followed by an act of the British parliament, will be required. Advanced drafts of the bill were sent out some time before the session opened to give the members ample time for consideration. Nothing more than formal opposition, if that, is expected.

Alberta may congratulate herself on the sale of the northern railways. Not only is the province relieved of their care but the new operators promise extensions to improve transportation in the districts served.

The serious question of unemployment has to be considered. This problem is dominion wide and so mixed with issues in economics and immigration that Alberta cannot solve it alone. The government has been negotiating with federal and municipal authorities in an effort to place the responsibility. Incidentally, a meeting of the mayors of many cities is now being held in Winnipeg to talk ways and

L. S. YOUNGGREN

REQUEST OTTAWA TO ASSIST WITH RELIEF MEASURES

Winnipeg.—The government of Canada will be approached by a delegation from western Canada, seeking cessation of unemployment difficulties, it was decided at the closing session of a two-day parley representative of cities, provinces and municipalities in the west. Among the delegation's requests will be formation of a scheme of unemployment insurance and decision by the Dominion Government to bear a share of unemployment relief expenditures.

An inter-provincial and Dominion conference should be called at the earliest possible moment for consideration of some Dominion-wide scheme of unemployment insurance, the conference decided. It was pointed out that a Dominion commission had approved the scheme, but that law officers of the Crown had opined that under the British North America Act the Dominion Government cannot inaugurate such a plan.

In the opinion of one meeting, the Dominion should bear one-third of unemployment relief costs, while the basis of agreements entered into in 1921 and 1922, and confirmed in 1924, provides that municipalities or citizens would divide equally the other two-thirds. The Dominion administration has contended that their stand was based on the agreement of 1927, by which unemployment was labelled a provincial matter, but the conference held that the 1927 situation was not parallel to that now existing.

Every city from Lake Superior to the Pacific coast was represented and government delegations to the parley attended from British Columbia, Saskatchewan and Manitoba. Unable to send a representative, due to the opening of the Alberta legislature, Premier J. E. Brownlie telegrammed to the conference that Alberta would support the meeting's decision. The Dominion Government was not represented, but Hon. Peter Homan, Minister of Labor, stated that he would bring the conference's requests before the entire cabinet.

Prime Minister W. L. Mackenzie King has stated that the Dominion Government would be prepared to consider the unemployment question, with a view to remedial measures, if the provinces of Canada join together in admitting they are unable to cope with the problem.

Delegates will return to their respective areas and ask the bodies they represent to agree that emissaries be sent to Ottawa. The delegates will then notify Mayor Ralph H. Webb, Winnipeg, of their intention, and he will set the date of the pilgrimage to the capital. Governments of the four prairie provinces, as well as of Ontario, will be requested to despatch representatives as members of the delegation.

Wheat Pool Conference In London, England

Canadian Pool Representatives Meet
Rt. Hon. J. H. Thomas, Lord
Privy Seal

London, Eng.—Preliminary discussions in which the threats of the conference of Winnipeg, last year, were taken up, was heard recently between Rt. Hon. J. H. Thomas, Lord Privy Seal, and representatives of the Canadian Wheat Pool, on the question of regulation of Canadian grain exports to Britain and establishment of grain elevator in this country. A. J. McPhail, of Regina, pool president; W. A. McLeod, of Winnipeg, publicity director, and D. R. McIvor, eastern sales manager, attended.

The meeting was in Mr. Thomas' room in the Parliament Buildings.

Extradition Not Wanted

Los Angeles.—W. R. MacKay, arrested here recently at the request of Canadian authorities for illegal transportation of machine guns across the Canada-United States border, has been released by the United States Commissioner's office. The commissioner ruled that Canadian authorities had not established sufficient cause for extradition of MacKay. He was sought at Vancouver.

Prince Studying South Africa

Cape Town, South Africa.—Notwithstanding the fact that during his stay in Cape Town, the Prince of Wales is spending the nearest thing to complete holiday that he has enjoyed in years, he is devoting considerable time to increasing his knowledge of South Africa, her main interest and problems.

W. N. U. 1823

Great Future For Canada

Sir Esme Howard Refers To Dominion's Enviable Position
Ottawa.—A suggestion whereby Canadian trade may be enlarged with the West Indies, a tribute to Hon. Vincent Massey, Canadian minister at Washington, and an expression of confidence in the future of this country were the features of an address delivered before the Canadian Club here by Sir Esme Howard, British ambassador to the United States.

With regard to the Canadian minister at Washington, the British ambassador said that from the day

Mr. Massey was appointed to this

there had never been a shadow of any sort between them.

"We have discussed matters of

common interest and matters of all kinds so friendly that we have become

friends and close brothers. But I

should like to say this, that the

establishment of the Canadian legation at Washington, so far from

creating difficulties for the conduct

of the affairs of our British Com-

monwealth, as some persons sup-

pose, has on the contrary been a

real help and assistance in the con-

duct of those affairs in the United

States."

Expanding his theme on Anglo-American relations, Sir Esme pointed to Canada's enviable position in having on its frontiers no hostile neighbour.

"Some think that the north geo-

graphical situation of Canada is a

drawback," he said. "But I don't

feel so sure about that because it

ensures you ever for from the dan-

ger of the problem of mixed races,

which is a most serious one in south-

ern countries; and it ensures you also from the relaxation of

mind and muscle which often is the

result of too constant contact with the sun god. You are endowed with thousands and thousands of square miles of fertile plains, with millions of horsepower of electricity waiting to be harnessed, with lumber and wood pulp almost incalculable, and lastly with a wealth of mineral deposits which have yet only just been scratched. You have all this and you have also the un-speakable blessing of political security without fear from attack from without."

"Who are your neighbours? On one side the North Pole, whose bears are not likely to prove a danger to this estate; and on the other side a great and friendly country, with whom you have had for over a century an arrangement by which armaments were laid aside and the frontier line was left almost as free from defences as those between one state and another of the United States."

Authorities Firm On Mennonite Question

Canada Will Not Permit Entry During Winter Months

Ottawa, Ont.—The attitude of the Canadian authorities with regard to the admission into Canada of the 6,000 distressed Mennonites in Germany is unshaken, and no permission will be given to bring them to this country during the winter months. This was stated by officers of the immigration department here. In the spring the department will give consideration to the case of these Mennonites, but no special privileges will be extended to them. Any action taken will be in conformity with the immigration laws and will be governed by the agricultural requirements of Canada then.

Motorist Was Rewarded

Ottawa, Ont.—Wilfrid Lebelle, Ottawa motorist, brought a party of skiers home from the Gatineau Hills when their car broke down on Sunday. He was surprised when members of the party asked to be dropped off at Government House. He went home and forgot about it until he received a letter of thanks from Her Excellency Viscountess Willingdon, accompanied by a handsome bouquet.

Pictures Are Proof

Toronto.—Helge Borup, a young Dane, who three years became a successful farmer in Northern Ontario, has left to spend a holiday in the land of his birth, and in his baggage will be 5,000 feet of film which he will show in many parts of Denmark as pictorial proof that splendid opportunities exist for those who are not afraid to play the part of pioneer.

To Speak Over Radio

London, England.—Lady Astor, Conservative member of the House of Commons, will broadcast over radio to Canada and the United States within about a week. Her address will be designed primarily for women and will urge them to continue their efforts for world peace.

Copy Was Clever Forgery

Expert Investigated So-Called Draft Of U.S. Declaration Of Independence

Toronto.—Faint pencil marks discovered by a hand-writing expert left no doubt that the so-called draft copy of the United States Declaration of Independence, now in Toronto, was a hoax, says the Mail and Empire in a news story.

"One of the cleverest forgeries ever committed," said the expert when he had completed his investigation. A powerful magnifying glass brought into evidence lead pencil markings about the strokes of the writing, says the paper. These markings indicated, the expert said, that the signature had been carefully drawn then inked in.

MAY EFFECT BIG REDUCTION IN NAVAL STRENGTH

London, Eng.—Rt. Hon. A. V. Alexander, first lord of the admiralty, told the House of Commons that Great Britain's cruiser strength in naval estimates for the next ten years would depend on the results of the Five Power Naval conferences.

Asked what increase or decrease for the next two five-year periods of the naval estimates would result from fixing the number of cruisers at fifty, he replied: "There are at present 54 British cruisers built, and four others in an advanced stage of construction."

"The effect on the British estimates of fixing the total at fifty cruisers depends on the size of the cruisers held down and the type of the cruisers built to replace those that become obsolete."

"The decision on these questions depends on the conclusions of the naval conference."

According to figures that Mr. Alexander gave to another questioner, the saving in the British naval estimates for the next six years would aggregate more than £52,000,000, if replacements of battle-ships as provided in article 20 of the Washington Treaty were deferred until 1936.

Mr. Alexander also told a questioner that decision as to proceeding with the three submarines remaining on the British 1929 naval program would be taken after the London conference had been concluded. The program originally provided for six submarines but three of these were later cut out.

The recent cancellation of two British cruisers is of no material significance, Mr. Alexander told a questioner who asked the reason for the abandonment and the effect of the decision on the unemployment situation.

"The suspension of work on these ships," he said, "was decided upon by the Government on July 1st, for reasons of high policy fully set out in a statement the prime minister made in the House of Commons, Jan. 14. As very little work had been done on these ships on that date the recent decision to regard them as cancelled is of no material significance and was taken in connection with the framing of the navy estimates."

The first lord of the admiralty said it had not been necessary to reduce dockyard employment in consequence of stopping work on these and other ships.

Suggests Help For Byrd

New York, N.Y.—Dr. Howard T. Barnes, of McGill University, has suggested that chemicals might be used to hasten the break-up of the South Polar ice pack if Admiral Byrd desired it. The work would be done, Prof. Barnes said, by forcing one vital break in the pack at the key point and the manoeuvring an actual shifting of the ice mass.

Father and Daughter Die From Burns Received In Fire

Kerrisdale, Sask.—Burned terribly from neck to knees on both the front and the back of his body, through his heroic efforts to save his children, Lester Matters, Tramping Lake farm boy, died in Kerrisdale Hospital. He had been there for 24 hours, in intense pain.

His injuries were received when fire practically destroyed his house following an early morning kerosene explosion, nine miles west of Tramping Lake. He and three children sustained burns in the explosion, one little girl, Nellie, aged 14 years, having succumbed to her injuries shortly after admittance to the hospital.

Farm Home Destroyed

Winnipeg, Man.—The Canadian wheat pool's policy of holding wheat for higher prices has helped to create the serious unemployment situation as it exists in Canada, Mayor Ralph H. Webb, of Winnipeg, stated recently. His comment made at the western conference on unemployment from the presiding chair, drew pronounced opposition from several delegates.

"I have not attacked the wheat pool in any shape or form," continued Mr. Webb in answer to criticism of his stand. "I am commenting only on the pool's present policy which the pool has a perfect right to practice. I hope it proves to be right."

"Hundreds of thousands of men

have been laid off by the railways as a result of the pool's holding policy," estimated the Winnipeg mayor in his first resume of the unemployment situation. He mentioned that the 1928 crop was not yet paid for, and payments on the 1929 crop were yet to come, as additional items tending to cause unemployment.

Canada should turn an eye to the United States, where "holding policies" have been directed in vain against Great Britain, Mr. Webb believed. He mentioned futile efforts of the United States to hold up Britain on beef, oil, cotton, rubber and tobacco, and resultant British moves to develop other resources.

Australia and the Argentine have quadrupled their wheat yields within nine and seven years respectively, the mayor held; Manitoba was producing 24,000,000 bushels where no wheat was grown six years ago; India had doubled her wheat yield in six years. Italy and France, the former never a wheat-producing country, were now meeting almost all domestic requirements, he said, "and Germany—ever an importer, was now exporting wheat to Britain."

Subsidized grain-growing, with 4,000,000 or 5,000,000 acres, put into new production in Britain, would be the result of bucking the British, Mr. Webb forecast.

"We may find that the government has had a lot to do with the present policy," stated Mr. Webb, referring to the wheat pool's stand, "and that may not bear very close investigation."

Major John W. Hair, of Saskatchewan, immediately dissociated himself from the "attack on the wheat pool made by Mayor Webb." He mentioned that Saskatchewan is proud of being the center of Canada's greatest pool production, and mentioned that he considered the wheat pool had done far more to create employment than to cause unemployment.

Strong protest against Mayor Webb's statements came from Ben Lewis, of Stonewall, Man., a director of the United Farmers of Manitoba. "These co-operative organizations came into existence through necessity," stated Mr. Lewis. "The farmers refused to produce grain at a loss, and insisted on a living wage."

It is because agriculture is in such a low state that the whole country is suffering. Politicians come out into the west, talking of prosperity, while the very causes of the prosperity—the farmers—are almost poverty stricken.

Almost unanimously, at the opening of a western "jobless parley" called in Winnipeg, they stressed the gravity of present conditions, forecast early aggravation of the situation, and opined that the Dominion Government should aid in unemployment relief.

JAMAICA SUGAR

This can truly be said of this little pleasantries because she belongs to the West Indies, where spice and sugar grow. Perhaps she is a little shy because the lady who took such a fancy to her was a very distinguished visitor to her home island. Both, Her Excellency Lady Willingdon, and the Viscount Willingdon, Governor-General of Canada, were highly delighted with their cruise through the Spanish Main. This photograph was taken on board the Canadian National Steamship "Lady Somers."—Canadian National Railways Photograph.

WILL LEAD PROGRESSIVE GROUP

Canadian Scouts Contingent

Governor-General Willingdon Thanks All Those Who Helped To Make Jamboree a Success

Ottawa, Ont.—Success of the Canadian Scouts' contingent who took part in last year's jamboree, in England, was due in large measure to the generous aid of Canadians, said the chief scout for Canada. His Excellency the Governor-General.

"To the generous subscribers in all parts of Canada to the special fund I personally raised for this purpose," said Viscount Willingdon, "I wish to express very grateful thanks, and also to the various individuals who subscribed sums for individual boys, which largely increased the numbers of our contingent. I wish to thank, too, all members of the executive of the association here at headquarters, for their loyal, devoted work, very particularly the members of the jamboree committee, who, under the chairmanship of Colonel Snow, made all the arrangements for this undertaking."

H. C. Nixon, who has been selected to lead the Progressive group in the Ontario House during the coming session.

Manitoba Beekeepers Meet In Winnipeg

Delegates Discuss Betterment Of Conditions Which Are Already Excellent

Winnipeg—Manitoba bee keepers

in the 23rd annual convention at the Royal Alexandra Hotel, discussed ways and means of bettering the already excellent conditions under which this province holds a three-year record in the Dominion for first grade granulated and extracted honey. The report of the secretary, L. T. Floyd, gives Manitoba's entire crop estimate at 6,899,339 pounds of honey, with an average of 144 pounds per colony. There are 2,856 apiaries and the spring and fall counts of colonies rates at 47,595 and 42,728 respectively. W. D. Wright, of Souris, Manitoba, representing the district west and south of Brandon, from whence the finest grades come, was congratulated upon winning Dominion sweepstakes this year with practically all the prizes in the classes mentioned during the last three years.

Roy Mullen, of Myrtle, was another outstanding beekeeper, having obtained 26,000 pounds from 100 colonies of bees.

Farm Home Destroyed

Father and Daughter Die From Burns Received In Fire

Kerrisdale, Sask.—Burned terribly from neck to knees on both the front and the back of his body, through his heroic efforts to save his children, Lester Matters, Tramping Lake farm boy, died in Kerrisdale Hospital. He had been there for 24 hours, in intense pain.

Australia and the Argentine have quadrupled their wheat yields within nine and seven years respectively, the mayor held; Manitoba was producing 24,000,000 bushels where no wheat was grown six years ago;

India had doubled her wheat yield in six years. Italy and France, the former never a wheat-producing country, were now meeting almost all domestic requirements, he said, "and Germany—ever an importer, was now exporting wheat to Britain."

Subsidized grain-growing, with 4,000,000 or 5,000,000 acres, put into new production in Britain, would be the result of bucking the British, Mr. Webb forecast.

"We may find that the government has had a lot to do with the present policy," stated Mr. Webb, referring to the wheat pool's stand, "and that may not bear very close investigation."

Major John W. Hair, of Saskatchewan, immediately dissociated himself from the "attack on the wheat pool made by Mayor Webb." He mentioned that Saskatchewan is proud of being the center of Canada's greatest pool production, and mentioned that he considered the wheat pool had done far more to create employment than to cause unemployment.

Strong protest against Mayor Webb's statements came from Ben Lewis, of Stonewall, Man., a director of the United Farmers of Manitoba. "These co-operative organizations came into existence through necessity," stated Mr. Lewis. "The farmers refused to produce grain at a loss, and insisted on a living wage."

It is because agriculture is in such a low state that the whole country is suffering. Politicians come out into the west, talking of prosperity, while the very causes of the prosperity—the farmers—are almost poverty stricken.

Almost unanimously, at the opening of a western "jobless parley" called in Winnipeg, they stressed the gravity of present conditions, forecast early aggravation of the situation, and opined that the Dominion Government should aid in unemployment relief.

MOVE MADE TO CHECK UP ON STOCK BROKERS

Winnipeg.—Across the prairies has sounded repercussions of the arrest of 10 Toronto brokers on charges of conspiracy to defraud. In Manitoba, Alberta and British Columbia, developments occurred in the move to check up on brokerage house activities throughout the Dominion.

Manitoba took the most drastic action of the day in the West, attacking bank accounts of unnamed brokers and adding to the list of companies under survey by province-appointed auditors. Early in January, the Manitoba Government initiated an audit in the Winnipeg office of Stobie Forlong-Matthews, Limited, and Solloway, Mills and Company, Ltd.

Voluntary action was taken, it was pointed out, because of the uncertainty which at present exists in the stock brokerage trade, and, because at present there was no means of ascertaining the exact status of affairs.

Attorney-General W. J. Major, K.C., refused to name the firms whose bank accounts had been led up at the order of the municipal and public utility commission, and would not state into what new offices auditors had been ordered. As yet, no action has been brought against any Winnipeg firm or branch by provincial authorities.

At Vancouver, following a special meeting of members of the Stock Exchange, an order was issued to Solloway-Mills and Company, Ltd., to cease from trading on the local market.

Traders for Solloway-Mills were withdrawn by the company from the floor of the Calgary Stock Exchange. It was denied that any suspension had been ordered, and affirmed that the move had been voluntary.

Attorneys-general of the western provinces are unanimous in their willingness to co-operate toward joint action by various provinces of the Dominion looking to uniformity of legislation. British Columbia, Alberta and Manitoba, have agreed to attend a national conference when and if it is called. Saskatchewan, though not able to attend a parley, owing to the coming session of the legislature.

At Calgary, Isaac W. Solloway and Harvey Mills, heads of the Solloway-Mills' organization, in police court appear at preliminary hearings on five charges of fraud and conspiracy.

World Grain Show

Manitoba Agricultural Societies Urged To Take An Interest In Big Event

Winnipeg, Man.—An appeal to all societies to arrange at once for representation at the World Grain Show, at Regina, in 1932, was made by J. Evans, deputy minister of agriculture for Manitoba, in an address before the agricultural societies convention recently.

Every society in Manitoba should be represented at the show, said Mr. Evans. He rejoiced at the interest manifested by junior seed growers in the production of better seed.

Endurance Test a Success

British Dirigible Al Air For Fifty Three Hours

Cardington, Eng.—The dirigible R-100 returned to its home port after a successful endurance flight lasting 53 hours.

The giant airship during that time flew a zigzag course over the southern part of England, crossed the channel to the Scilly Islands, flew back over Plymouth, the Isle of Wight, Dover, the Southeastern coast ports and once again over London.

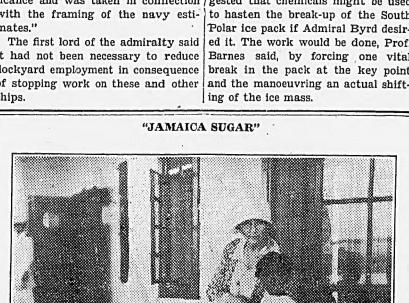

She started in misty weather and arrived home in a mist.

B.C. Honors Pioneer Women

Victoria.—The legislature of British Columbia, in its opening ceremonies paid tribute to the pioneer women of the province, who had helped lay the foundations of Canada on the Pacific. A dozen pioneer women occupied seats on the floor of the House, and received tributes on behalf of those they represented, the government and opposition.

Another Royal Wedding

Vienna.—Dispatches from Bucharest say that the wedding of Princess Elena, daughter of Dowager Queen Marie, to Count Alexander, of Pless, has been fixed for the second half of February.

They say that little girls are made of sugar and spice and all that's nice. This can truly be said of this little pleasantries because she belongs to the West Indies, where spice and sugar grow. Perhaps she is a little shy because the lady who took such a fancy to her was a very distinguished visitor to her home island. Both, Her Excellency Lady Willingdon, and the Viscount Willingdon, Governor-General of Canada, were highly delighted with their cruise through the Spanish Main. This photograph was taken on board the Canadian National Steamship "Lady Somers."—Canadian National Railways Photograph.

Canada Is Largest Exporter Of Wheat In the World and Ranks Second In Production

In the comparatively short period of three-score years, Canada has emerged from an insignificant position in world production to that of the largest exporter of wheat, and ranks second (excluding the Russian Soviet Union), as a producer of wheat, ranking, on an average, about ten per cent. of the total world production, only the United States exceeding Canada in this regard.

Wheat and flour were exported from the Dominion during the crop year 1928-29, to nearly 80 countries, the total amounts being 354,494,696 bushels of wheat, and 11,898,775 barrels of flour. Total world exports of wheat and wheat flour, expressed in bushels of wheat, amounted to 1,002,439,000 bushels for the year, July 31, 1929, of which Canada contributed over 40 per cent.

The British Isles took 209,571,742 bushels of Canadian wheat and 2,637,867 barrels of flour, more than one-half of the total exported. Japan was the Dominion's next best customer of wheat with 22,700,487 bushels; the Netherlands were third with 22,121,680 bushels; Belgium fourth with 16,577,716 bushels; Italy fifth with 15,571,311 bushels, and Germany sixth with 14,063,724 bushels. The other purchasers of Canadian wheat are widely scattered throughout the world.

China was first in the list of consumers of flour with 3,040,687 barrels, surpassing the British Isles which took 2,637,867 barrels as above. Germany stood third with 1,097,289 barrels.

Flour produced from the crop of 1928, made a new record for the flour milling industry in Canada. During the crop year ended July 31, last, wheat ground in commercial flour mills totalled 94,795,316 bushels, as compared with 86,842,296 bushels during the crop year 1927-28. This is an increase of over 7,950,000 bushels. Flour produced amounted to 209,893,252 barrels as compared with 18,910,384 barrels for the previous year. This increase amounted to 1,982,865 barrels of flour.

During the same period exports of wheat and flour amounted to 11,808,775 bushels, and 9,865,754 barrels respectively. The increase in exports was 1,943,021 barrels, or practically identical with the increase in flour production.

During the crop year 1928-29, Canada made new records in the production and export of wheat and in the manufacture of wheat flour. In addition to her position in the "wheat field," Canada produces nearly ten per cent. of the world's oats, and ranks eighth in cheese production, and fifth in that of butter.

Contests Canada's Claim

South Africa Says It Has World's Record Milk Producer

South Africa is contesting the claim made in a cable from Ottawa that a Canadian Holstein cow, "Teke Waldorf" is the world's record milk producer. South Africa claims an Orange Free State cow, "Butterfly" produced no less than 30,004 pounds of milk in 365 days, containing 1,254 pounds of butter. The yield is verified by an official government test. Furthermore, there are a number of other cows in South Africa which have surpassed "Teke Waldorf's" record, it is stated.

Industrial Manitoba

"General conditions in Winnipeg are extremely satisfactory and the outlook very promising," said President Edward Anderson, K.C., of the Winnipeg Electric Company. "Manitoba is fast becoming an industrial province; its industrial output in 1928, and to a greater degree in 1929, being larger than its agricultural output."

"Shall we escape from the dull company?"
"I can't. I am the host."—Hummel, Hamburg.

W. N. U. 1823

Taking Safety Measures

Compensation Accidents Are Showing a Considerable Increase In Ontario

A New Year's resolution which we recommend to everyone may be summarized in the expression "Safety First." The advice is not new; it has been given frequently in many shapes, but the necessity for it remains. The Workmen's Compensation Board, of Ontario, for example, reports that during 1929, the accidents coming under its notice numbered 87,103, which was 7,705 more than in 1928, and that benefit awarded amounted to \$3,102,157, which was an increase of nearly \$1,000,000 over the previous year. These increases, both in number and in benefits are out of all proportion to the growth of population. Industries are not becoming more hazardous nor are there many new ones which, in their nature, make employees more liable to accident. We do not know the reasons for these increases, but it is evident that still more care must be taken in all the trades which come under the jurisdiction of the Workmen's Compensation Board. In other walks of life the number of accidents is probably also increasing. One reason for this is the growing popularity of motors for both passenger and freight services. The streets are far more dangerous than they used to be, and it behoves all to exercise the greatest care in moving along or across them. In urging "Safety First," no one is properly open to the charge of teaching timidity. The fact is that bravado shows lack of common sense whether in trades or other occupations, in sports or in the simplest actions of life. To exercise a fair amount of caution should be universal rule.—Mail and Empire.

Mechanizing the Farm

66,220 Tractors Now In Use In the Prairie Provinces

Though the popularity of "Old Dobbin," as the farm horse is affectionately known, continues to hold a prominent place on the farms of Canada, the "Iron Horse," or the mechanical farm implement, is advancing in popularity, particularly among farmers in the three Prairie Provinces—Manitoba, Saskatchewan and Alberta. There are, according to a recent estimate, a total of 66,220 tractors, in operation on the 248,162 Canadian prairie farms, 14,557 of which were bought last year. In Manitoba there are 12,346; in Saskatchewan, 35,083; and in Alberta, 18,791 farm tractors.

The total of harvester-combines in use on the Prairies at the end of 1929, was 7,726, of which 3,295 were bought last year. In 1926 only 176 harvester-combines were sold. The following year the sales were 598. In 1928 they jumped to 3,657, an increase over the previous year of 611 per cent. Sales of threshers in the three Prairie Provinces last year totalled 2,095.

The Brandon Fair

Sixtieth Anniversary Of Entry Into Confederation Will Be Commemorated This Year

Manitoba's sixtieth anniversary of her entry into the confederation will be made the outstanding feature of the provincial exhibition, at Brandon, this year. Directors of the fair have decided to further plans in this connection, and attractions which will add to the occasion are under review.

It is probable that the exhibition will have several stand out attractions over and above the regular programs to be outlined for the association of western Canada exhibitions.

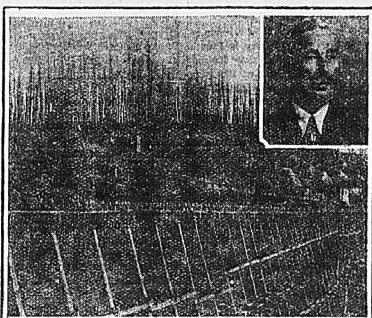

An important item under discussion will be the completion of the racing programme for all western fairs. For the first time, all of the exhibitions have decided to feature only running events, and as a result they will be able to offer inducements to the gallopers and a better balanced programme than previously. The matter of midway shows contracts will also be decided on at the meeting.

English Unmoved

The Kansas City Star is at peace with all the world except the English who drive on the wrong side of the road, can't spell tires, call gasoline petrol, and call a radio set a wireless." However, we doubt whether the English will be much moved in view of the fact that the editor of the Star drives on the wrong side of the road, can't spell tyres, calls petrol gas, and calls a wireless a radio set.

Shakespeare's Income' toward the end of his life was equal to \$25,000 a year in modern money.

Old Timer Retires

Back in 1882 when the Canadian Pacific Railway was pushing through the bush in Northern Ontario on its way across the continent, this old-time engine did a lot of good work and it was fired by James T. Fallon, who had joined the road three years previously. On the last day of 1929, Fallon, for over forty years an engineer, closed more than fifty years of railroad service. His picture is inset with that of the locomotive, No. 222, sister to the one on which he worked as a youth.

Grain Elevators In Operation

Saskatchewan Has Four Thousand According To Recent Check

More than 4,000 grain elevators are now in operation in Saskatchewan, according to a check made by G. T. Thomson, who conducted the first inspection of such facilities, a new activity inaugurated as a preliminary to the operation of the new Workmen's Compensation Act. All the modern elevators were found to be provided with safety devices, the first report revealed, though some of the older ones were found to be in need of additional protection equipment.

The man who deals in sunshine.

Is he who gets the crowds.

He does a lot more business

Than the one who peddles clouds.

The saddest news of the week is the story of the ambitious youth who joined the Navy to see the world and spent four years in a submarine.

Canada Popular With Tourists

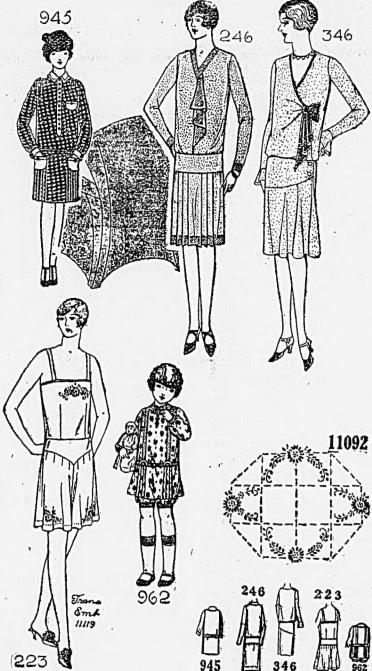

About Nine Million People From U.S. Visited Dominion Last Year

The growing popularity of Canada among tourists is indicated by the recent official estimate that about 9,000,000 persons from the United States visited the Dominion last year. Of this number 250,000 visited the national parks of Canada. Canada maintains 23 national parks and reserves located in different parts of the country with a total area of over 29,000 square miles. In these parks the outstanding natural beauties and wild life are presented. Hunting of game is forbidden and any visitor entering one of the parks or reserves with a gun must submit to having it sealed before entering.

"Prisoner, the jury finds you guilty."

"That's all right, Judge. I know you're too intelligent to be influenced by what they say."

Regulations Governing Oil And Gas In Turner Valley Recommended By Commission

Sowing Discolored Wheat

Is Likely To Result In Decrease In Yield

The results of experiments carried on at the Dominion Laboratory of Plant Pathology, Saskatchewan, indicate that it is a very serious practice to sow wheat that is discolored or abnormal. The germination of blackened kernels is anywhere from 10 to 50 per cent. below normal, and the plants which result from the ones which do germinate are very often weak and sickly in appearance, and die before maturity, resulting in a decrease in yield.

Judging from numerous samples of seed sent to the laboratory from widely separated parts of Saskatchewan the percentage of discolored and blackened kernels is, in some cases, quite high. If the practice of sowing these is continued the results may, in time, become serious to successful wheat growing. By sowing such wheat, the farmer gives these fungi, which are carried by discolored kernels, a chance to become established in the soil, and when there, live for years. It is very much easier and safer to eliminate the cause of the diseases of wheat by sowing the best seed obtainable, than to try to control the disease when they are once established in the soil.

B.C. Shipping Trade

Remarkable Growth Is Shown In Figures Presented By Government

Increase in the shipping trade of British Columbia since the year 1910 is shown in a series of tables appearing in the British Columbia Manual of the B.C. Government through the Bureau of Provincial Information. The leading table shows that the deep-sea and coastwise tonnage of all British Columbia ports has jumped from 410,795, in 1876, to 49,325,510 in 1928. Deep-sea tonnage, in 1928, was 21,908,733, and coastwise tonnage 27,427,186. Another tabulation gives comparisons of the number of ships entering and leaving British Columbia ports. In 1914 there were 5,637 inward and 5,713 outward ships, and in 1928 there were 9,336 inward, and 9,468 outward ships in the sea-going class. The inward tonnage in 1914, was 5,250,397, and the outward 5,329,776.

Life-Size and Natural

Figures On Building In Montreal Looked Real To Revere

There is a financial institution in Montreal which was built some years ago in the grand manner. High above its portals is a ledge on which are placed life-sized stone figures representing various legendary individuals. So happens that construction work is being undertaken nearby, and the steam from an engine occasionally wreathes the adjoining building in smoky mists.

On the day before Christmas a reverer passing by looked up at the stone carvings, and so doubt confused by the clouds of steam which surrounded them, shouted loudly. "Don't jump, boys, the frenemy will be here in a minute."—Financial Post.

Luck Is Only Secondary

Man Must Show Ability In Order To Succeed

(Mr. Snowden says that no man succeeds who never takes the opportunities offered him; and the unlucky man cannot be a successful man.) Can mere "luck"—whatever it may be—make a man successful? It may float a pure medley to great places and even apparent power. But if he is only a mediocritie he will not long retain the place, and he will never be able really to exercise the power. Has he then "succeeded"? Again, the successful man must take his opportunities; yes, but more often than not he must make them, too.

Canada's Progress Phenomenal

Characterizing Canada's development during the twentieth century as relatively the most phenomenal the world has ever known, exceeding even the unprecedented development of the United States in the nineteenth century, Col. J. H. Woods, Calgary, president of the Canadian Chamber of Commerce, delivered an inspiring address on the country's future development at a banquet of the Woodstock Board of Trade.

Aspirant: "May I count on your supporting me?"

Citizen: "Are you running for office, or do you want to marry my daughter?"

Adequate regulation of the production of oil and gas in Turner Valley is recommended by the conservation commission appointed last year by the Federal Government. The commission has reported to the government and the report has been made public. The members of the commission were Dr. Charles Carmell, deputy minister of mines; A. W. G. Wilson, Charles Ross, R. C. Wallace and A. A. Carpenter.

After pointing out that the wastage of gas in Turner Valley now approximates 200,000 cubic feet per day, was equal to 9,000 tons of high grade coal, the report states the position as follows:

"It is obvious that in the Turner Valley present operations are rapidly and wastefully dissipating a great natural resource only about 10 per cent. of which is usefully employed. This wastage takes place through the operators' careless license of about 10 producing companies. It is probable that the number of producers will be increased shortly and that the waste also will increase. Only about 30 per cent. of the area is operated under government license, the mining right of about 70 per cent. having been alienated from the crown by miners.

"These producers are primarily interested in obtaining as great a naptha recovery as possible in as short a time as possible. No voluntary steps of consequence have been taken to curtail wastages or to prolong the lives of the wells. While it may be to the advantage of the individual producer to obtain quick return from his investment, it is definitely not in the ultimate interest of the producer himself to permit this rapid dissipation without utilization of a great national asset for the immediate benefit of a few."

In regard to a solution, the report recommends:

"The only solution which will make conservation possible is recognition of the fact that Turner Valley is a gas field and the formulation of rigid regulations for the purpose of controlling all phases of the gas producing industry. If existing legislation is not adequate to protect the public interest, it should be re-drafted to meet the situation. These regulations should be administered uniformly by one body representing both federal and provincial parliaments. This is the first and most important step to be taken. Other measures can only be palliative. This action is also a prime essential to the further development of industries based on the presence of this gas supply in Alberta."

"Without regulation and without control of production, industries cannot be assured of an adequate supply of gas over a period of time long enough to warrant essential capital investments. New supply is not only to investments in the new distributing pipe lines but also to investment in manufacturing industries using natural gas and to the development of industry based on chemical and metallurgical research. Adequate regulation will provide a limited industrial development will result."

Saskatoon Exhibition Surplus

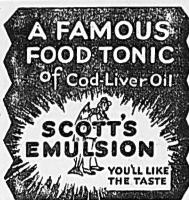

Date Of Exhibition For This Year Fixed For July 21 to 26

A surplus of \$10,667.23 is reported by the Saskatoon Industrial Exhibition Board covering operations in 1929. This is considered very satisfactory in view of crop conditions at the time of the fair. The year featured large increases in exhibits of livestock, agricultural and industrial products, and the erection of three new buildings in the grounds. This year the date of the exhibition is fixed for July 21st to 26th.

The western winter wren measures less than four inches from the tip of its beak to the end of its upturned tail.

Whales spout air from the lungs three to ten times, then run submerged for ten minutes or longer and repeat.

WORLD HAPPENINGS BRIEFLY TOLD

The department of national defence has ordered 16 new light aircraft for use in connection with training in the Royal Canadian Air Force, at a cost of \$85,000.

Most of 7,000 women employed on the clerical staff of the British civil service voted "no" in a ballot on the question of whether women ought to retain their jobs after marriage.

Oversome by poison gas as his sons were pulling him up a 75-foot well on his farm, near Raymore, Sask., Mike Grymalski fell down the shaft and was dead when extricated later in the day.

The total cost of pensions in Ontario this year will be in the neighborhood of \$5,000,000, according to a statement made by Hon. Dr. Jamieson, chairman of the Old Age Pensions Board.

A total of 336,072 amateur radio receiving licenses were issued by the radio branch of the Department of Marine for the 1929-30 period up to the close of last year, according to figures made public. The total for the 1928-29 period was 296,928.

Formal request that the postmaster-general of Canada consider the early extension of the postal air mail service to Vancouver and other British Columbia points is contained in a resolution that has been unanimously adopted by the Vancouver city council.

Members of the Canadian Manufacturers' Association sailed from Halifax on the steamer "Lady Drake," to study the British West Indies regarding development of trade with Canada. The party will sail through the Indies as far as Demerara.

Toronto's general assessment has reached for the first time in the history of the city over one billion dollars and the population over six hundred thousand," said Assessment Commissioner W. G. Farley, in submitting his annual report to the city council.

Manitoba Fruit

Commercial Fruit Growing Now Placed on a Profitable Basis

Fruit growing on the plains of Manitoba is to be placed on a profitable basis, according to the marketing report tendered by Mrs. S. M. Lorse of Corman, Manitoba, at the annual convention of the United Farmers of Manitoba, recently. Prospective fruit growers will be afforded accurate statistics on the yields and hardiness of crops. Demonstration orchards in various parts of the province were established some time ago, said Mrs. Lorse, but the reorganization work of the coming spring is expected to yield definite results. Apples, plums, strawberries, raspberries and currants are now produced commercially by about a dozen growers.

National Research Laboratories

Work on the new Canadian Government National Research Laboratories to be built in Ottawa, is about to start. The contract for the building has been let for \$2,774,000 and the work is to be completed in 14 months.

Faint, Dizzy Spells

Had To Sleep

Propped Up In Bed

Mrs. Norman Bishop, Salisbury, N.B., writes: I was taken with faint, dizzy spells and would lie down I would suffer terribly with smothering spells. I got so bad I had to sleep propped up in bed. "My doctor said it was my heart and nerves, and that I needed a good heart tonic."

"I was advised to take

and I had not taken one box when I could lie down and sleep like a child."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

W. N. U. 1823

Important Factor In Airplane Of Future Manufacturers Turning Their Attention To Building Safer Machines

Much is expected of what has been popularly described as a "fool proof" airplane that has come into existence with an award of a prize of \$100,000 following an exhaustive series of tests at Mitchel Field, outside New York City. The conclusion of these tests and the awarding of the prize is held to mark another forward step of great importance in aviation. Quality production of high-speed machines was the natural consequence of the safe flight of Charles Lindbergh, from New York to Paris, and it is only within a comparatively recent period that airplane manufacturers have turned their attention to the element of safety as an outstandingly important factor in the aeronautics of the future.

There has been no divergence of the details of the performance of the winning machine beyond the fact that it has a maximum flying speed of 38 miles an hour. That a machine can go along at what is a medium rate of speed for a motor car indicates what amazing advances have been made in the safety of aeroplane operation. And it may be assumed that once the aeroplane is so made that its operation is approximately as safe as the motor car, people will take to the sky in much larger numbers than at present.—Regina Daily Post.

(By Anabelle Worthington)

3015

Chic dressmaker details are smartly evident in printed sheer velvet tiered model in striking Independence blue coloring.

The swathed hip with crystal belt emphasizes the higher waistline so important in the mode. The irregular closing of collarless neckline is unusually becoming. A buttoned apron of trimmings balances the fullness of the bustiness.

Sleeves have darts below elbows. The circular tiers sway gracefully each time wearer moves.

It proves that good taste is not exact knowledge. This is a Paris model that is to be copied exactly at the cost of the fabric, and have the added advantage of choosing a flattering cutout.

Design No. 3015 comes in sizes 16, 18, 20, 22, 24, 26 and 28 inches bust.

It is exquisite in plain transparent velvet, and suitable for afternoons and informal evenings.

Black crepe satin is dignified for all-day occasions. It is very effective made of the dull surface with the texture of crepe de chine.

Canton crepe in vintage red, army blue crepe de chine, and crepe Elizabeth Maroon Glace are outstandingly smart.

Pattern price 25 cents in stamps or coin (coin preferred) Wrap carefully.

A Remarkable Exhibition

Paintings By Inmates Of Mental Hospitals Seen in Paris

Art or madness? Few of the visitors to the Max Blanq Gallery, in Paris, were able to tell, when they looked around the walls. Many of the pictures were scarcely distinguishable from the most imaginative work of present-day artists, while others showed such removal from the ordinary laws of composition as to belong in a class by themselves.

It was an exhibition of the works of lunatics, inmates of various insane asylums. Some of the exhibitors are classed as only mildly insane, while others at times reach the violent stage and have to be put in strait-jackets. Their art is a pastime with them, and their mental state is not due to their art.

It was one of the most extraordinary exhibitions ever held here. It was called "Artistic manifestations of the brain-sick," and was organized by Dr. A. Marie, alienist, the Marquise de Ludre-Froide and M. Blane. Artists and art lovers took a keen interest in studying the works.

The exhibition was intensely morbid, and what manifestations of mania and art were not made by the artists themselves, the organizers supplied in the form of photographs and old engravings showing Bedlam at its worst, including German and other European mad houses and Middle Age torture methods once applied against the insane.

One of the most fascinating models of art, as shown by the catalogue, was withdrawn from the exhibition at the last moment.

It was an imaginative work of a three-toed mammal in a primeval forest swarming with life. Under the drawing the artist, now sane and holding an important position in public life, had written: "Where was I? —On what planet?"

Recipes For This Week

(By Betty Barclay)

ORANGE OMELET (Serves 4-6 Persons)

6 eggs.
2 tablespoons powdered sugar.
1/4 teaspoon salt.
1/4 tablespoon cornstarch.
2 teaspoons lemon juice.
1/2 cup orange juice.
Sliced oranges for garnishing.
Extra powdered sugar.

Separate egg yolks from whites. Mix together the sugar, salt, cornstarch, lemon and orange juice. Beat the egg yolks light and add this mixture to them. Beat the egg whites stiff and dry. Fold in the first mixture and turn into a well-oiled omelet pan. When done garnish with the sliced oranges sprinkled with the powdered sugar and serve.

CABBAGE STEWED BROWN

Stew one chopped onion in one spoonful of soup fat and cook it with half spoonfuls of granulated sugar until golden brown. Add one pint of half vinegar and half water, a handful of white cabbage shredded like noodles, after removing the stalks and thick veins, and some salt. Stew tightly covered for several hours, adding frequently and occasionally adding some water or weak beef broth. The cabbage must be pleasantly piquant. It should taste sweet-sour and be golden brown and glossy. If desired, a little flour can be dusted over and mixed with 1/2 hour before serving.

Saskatoon's Progress

All Evidences Point To Rapid Growth During Past Year

The City of Saskatoon made substantial progress during 1929. Its findings are in excellent shape. A larger proportion of current taxes have been paid than ever before, which includes taxes on for-profit properties, and the net outstanding taxes amount to \$800,000, which is about \$1,000,000 less than in 1928. There was an increase of about 800 pupils in the schools. The electrical output increased about 30 per cent; the value of city owned real estate amounted to \$130,000 and passengers carried on the street railway showed a gain of 15 per cent.

Patent price 25 cents in stamps or coin (coin preferred). Wrap carefully.

Never Give Up

When things go wrong, as they sometimes will, and the road you're treading seems all uphill when the funds are low and the debts are high, and you want to smile but you have to sigh, when care is pressing you down a bit, rest if you must, but don't you quit.

"It's so good of you, doctor, to have come this far to see my husband."

"Not at all, madam, not at all. I have a patient next door and I thought I'd kill two birds with one stone."

ZAM-BUK

Ends Pain, Swelling & Bleeding Of HÆMORRHODS (Piles)

SUNDAY SCHOOL LESSON

FEBRUARY 9

WARNING AND PROMISES

Golden Text: "Every tree that bringeth not forth good fruit is hewn down, and cast into the fire." —Matthew 7:19.

Lesson: Matthew 7:1-20.

Devotional Reading: Proverbs 2:1-8.

Explanations and Comments

The Golden Rule, verse 12—All things therefore whatsoever ye would not men do unto you, do not unto others. Into the context shows the meaning of the "therefore"; since God is so good to us, we must be good to others. "With these words Jesus closed up the lesson in Matthew 7:27, and Martin Luther said, "Let us gather them all up in a little bundle."

For this is the law and the prophets, the two collections into which the whole of the Old Testament is divided. "We have to a certain extent this was a necessary; but, no doubt, seriously meant; therefore it may help us to understand the meaning of the commandments."

The Golden Rule was Law and Prophets only in an ideal sense, and in the same sense only was Christ a Teacher.

Distinguishing False From True Teachers, verses 15-23—Beware of false prophets, warned the Master. They come to you in sheep's clothing, but inwardly they are ravening wolves, rapiacous workers of evil. The lamb or sheep was the symbol of innocence or helplessness; the wolf, of all sorts of evil, including the devil. "The excitement; the force of custom brooks, the deep fountains of the soul bursting forth; witness the crowds who followed John and Jesus, and the fierce enthusiasm of the crowd of Heaven suffering violence (Matt. 11:12). Such times call forth true prophets and also spurious ones, in religious sympathy with prevalent tendencies, who are anxious to profit by their own advantage in gain or influence, men of the Judas type." —A. E. Bruce.

How shall the importers be recognized? By their fruits, said Jesus. Character is revealed by conduct. Thousands Pay Radio License

Prairie Provinces Are Well Up In Number Of Owners

For the first time since radio broadcasting commenced, more than 300,000 owners of receiving sets in Canada have paid the annual license fee of \$1 this year. Of these just half are located in Ontario and over 40,000 are in Toronto. Not all the people who own radio sets pay the dollar, in fact, it is known thousands dodge the tax. By provinces the number of licensed receiving sets is now as follows: Ontario, 146,682; Quebec, 49,760; Prince Edward Island, 509; Nova Scotia, 8,893; New Brunswick, 6,141; Manitoba, 18,728; Saskatchewan, 22,467; Alberta, 14,332; British Columbia, 25,981.

Use Minard's for Neuralgia.

The letters of the English alphabet have a date, 2,500 years old. They have developed gradually from ancient picture signs like the Egyptian hieroglyphics.

Shark's teeth are used for money in some of the Pacific Islands; while in China they are mounted in gold to form attractive ornaments.

OPEN SORES

HEAL IN QUICKEST TIME
"Sores and blisters heal in hours, then in few days." Jules Blundell, "Botha-Salve" healer, says "Botha-Salve" heals sores, eczema, like magic. All drugs.

Returns From Extended Tour

Sir John Aird Expresses Views On World Markets

Sir John Aird, president of the Canadian Bank of Commerce, and envoy to the Pacific relations conference, has returned after a four months' trip to Egypt, the Orient, France and Great Britain. He remarked sacrifices must be made by all the component parts of the British empire if the goal of intra-empire trade is to be realized. Trade between the Orient and Canada should be greatly stimulated and would be equally beneficial as a result of the Pacific relations conference, China and Japan were seen as amicable understanding of their difficulties in Manchuria, Great Britain must retain a good commercial fleet, these were some of the convictions expressed by Sir John on his arrival at Toronto.

"Trade between Canada and Japan has been growing steadily for the past few years," he said. "The result has been mutually beneficial. Japan is regarded highly as a wheat consuming country and our produce is regarded highly in both Japan and China. Japan is also a good market for machinery and clothing."

Honor Canadian Author

Tablet In Memory Of Arthur Hunt Chute Unveiled

That Canada may remember Arthur Hunt Chute, author, soldier, gentleman, who gave the Canada of his day a realization of its heritage and a vision of its empire of the north. On September 22, 1929, he was killed flying northward.

The above is the tribute appearing on a bronze tablet presented to Acadia University, Nova Scotia, by Toronto editors in memory of Arthur Hunt Chute, who was killed when the plane in which he was making a trip through the north crashed in Lake Manitoba. The tablet was unveiled by R. Napier Moore, Toronto magazine editor.

May Create New Market

Should a trial ton shipment of British Columbia certified potatos carry satisfactorily to Buenos Aires and give good results, a big market for this province's certified seed potatos will be obtained in South America, a quotation 600 tons of certified seed of the Burbank variety having already been requested.

COUGHS-COLDS

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost immediately. It is the approved method. You will never use another.

"I am sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years now, containing excess acids. Each bottle contains full directions—any drugstore."

built in the days when most Wichita dwellings were set flush with the sidewalk. Charman's great-great-grandfather had explained (when curious neighbors commented on this fact), that he was unwilling to sacrifice the young elm tree but most of his questioners suspected that the underlying reason for this unusual proceeding was because great-great-grandma Davis "hated dust."

This, at least, was the story that had come down to Charman, who declared that if her great-great-grandmother could have foretold the dust of the present day with automobiles passing at forty miles an hour, she would have set her mansion in what was then the cow pasture!

"Well, if she had," commented Grandma Davis wisely, "it wouldn't have been near so handy for the shop."

Charman smiled. The shop, which was once the honored parlor of the old Davis house, was an innovation against which Grandma had bitterly rebelled when it was first suggested by Charman's widowed mother.

At that time Charman was but a little maid of six, yet she remembered vividly the battle that took place before Grandma Davis capitulated to her daughter-in-law's irrefutable argument that it was more honorable for a Davis to run a shop in the best room than to go into debt.

She remembered all the time when the fine imported carpet was removed, and the coming of the highboy taken "up attic" in order to make room for the rolls of silk and the skeins of silk and cotton—the pins and needles—bright wools and other fascinating odds and ends which were to be paid for "by installment," whatever that was.

Wickfield was in sore need of a dry goods store, for Henry Oldham, who had run the general store for forty years, rarely replenished his stock, and one had to drive clear to Eastboro in order to match a skein of yarn!

Hence the neighbors, after a moment's shocked surprise, welcomed the thought of buying their fancy goods of Charman's mother; and as Grandma grew older, the little shop,

against which she had fought so valiantly, became her greatest source of entertainment.

Charman was fifteen when her mother died, but she managed to finish high school, to go to the State Normal at Eastboro, and keep house for Grandma, while the old lady sat contentedly in the front window and waited on occasional customers, unless, as was usually the case, they waited on themselves. Indeed the Davis house would hardly have seemed natural without Grandma's face peering from behind that twenty-four-paneled window. Once, stepping in upon an errand, Ezra Bascom had offered to pull a whole pane of glass in the lower sash, so she could see the passing better.

"I could have it easy enough today," he urged; but the old lady shook her head.

"It's real kind of you, Ezra," she said gratefully, "but my husband's grandfather, Luther Davis, built this house, and I've never felt called to want it changed. Seems as if one pane of glass wouldn't easily suit it, though I've no doubt Charman would find it easier to clean. Charman's terribly particular about windows. She says a solid window can just spoil a nice, sunny morning; and I dunno but what she's right. Once when she was a little girl she gave me a wiper for my spectacles. It said on it: 'The world will never look quite right unless you keep your glasses bright,' and I presume the same thing applies to windows. No, Ezra, I'm just as obliged to you, but I guess we'll stick to Grandma Davis's old windows. Charman thinks the world and all of them."

"Well," responded Ezra, good-naturedly, "there's no accounting for taste. Now the first thing Emmy wanted when we was married, was for me to take those small-pane windows out o' the old house, and put in new ones. She's kept at me ever since, and at last I've done it; and I will say, Grandma, that they look handsome. But that city feller, who's living down at Irving Plummer's, acted like I'd broken all ten commandments when I suggested changin' the windows along with the other improvements he's put in. No, there's no accounting for taste. He bought the place and furnishings as they stood, and he's give Hettie Plummer's, and the old oak extension table, the one she sent clear to Portland for, to his hired man, and he's usin' an old mahogany drop-leaf that Grandma Plummer kee' her preserves on in the cellar!"

"Do tell!"

"Yes, ma'am," replied Ezra, moving toward the door, "that's my story. I may be struck dead where I stand."

He felt in his pocket for his cap, and drew out a scrap of bright silk.

"Gorry! I clean forgot what I was here for. Emmy wants a spool o' silk to match this sample. She's makin' her new waist to wear to the strawberry festival."

"Let's see," said Grandma eagerly, stretching out a hand for the sample.

"That's real pretty. Emmy always did look best in blue, even when she was a baby. You open the top drawer, Ezra, and find a spool to match."

"Emmy didn't," hesitated Ezra, like a well-trained husband, "that I was to let Charman pick it out. She says I ain't got an eye for color."

Grandma chuckled.

"And I suppose she won't trust me, either. I done as I blame her. My eyes are getting old along with the rest of me. Charman's up attic. You whistle at the back stairs and she'll come down. There! she's comin' now."

"Dearie," she called, "you come right here. Emmy Bascomb wants you to shade out a spool o' silk to match her waist. Seems to me she remembers her blues are gettin' sort of low."

Yes, the little shop had been Grandma's unfeeling source of entertainment for many years. Even when with the invasion of automobiles, Eastboro became more accessible, the neighbors did what shopping they could at Grandmas, not only to help her out, but to make excuse for running in the chair during the long days when Charman was away at school. If, nineteen years before, Wickfield had been shocked at the thought of a shop in Lawyer Davis's boom town, it had long since become as accustomed to it as had Grandma herself; though at times the old lady wondered, with an inner chinko, what her husband's father was thinking as he viewed the change from his mansion in the Eternity City.

For Roger Davis had been a lawyer—a man of education. His office, a small, one-story building, still stood across the drive that led to the big barn. He had been what in those days was called "a scholar and a gentleman," but, although he sent his son to college, "Grandpa Davis," after a year of reading law in his father's office, had "gone back to the land"; and being more of a dreamer than a worker, he left the old place rather worse off than when he fell heir to it. For he had found it pleasanter as

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, sour and acid stomach? Many believe they have heart trouble and treat themselves accordingly and minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and never feel the gases. Swallow them and acid stops, relieve the gas and encourage digestion.

The stomach, liver and bowels will be cleaned of poison, painful and dangerous indigestion disappears and the system is strengthened. Don't delay. Ask your druggist for a 25-pkg. of Carter's Little Liver Pills.

well as easier, to let his horses rest when they should have been dragging the plow, while he feasted his beauty-loving eyes on the hills that surrounded Wickfield on every side, and composed "poetry."

Grandma was very proud of Grandpa's poems. Once one of them was printed in the Eastboro "Telegraph," and the minister read it from the pulpit. That was a proud day for Grandma Davis. She still kept a clipping of the poem between the pages of her Bible, and read it every night after she said her prayers. To her loyal heart it was a legacy more beautiful than gold or precious stones.

And now, though she and Charman were left alone in the big house, it never occurred to them to leave it. To Grandma it was "home." To the girl it was not only home, but something that gave her a sense of satisfying pride. For was it not something to be proud of, to live in a house built by ones great-grandfather? This alone was compensation for the things she lacked—things that were, to many a girl of her age, the breath of life.

(To Be Continued.)

Has Long Railway Experience

H. H. Melanson Appointed Assistant To Robert L. Burnap, Of Canadian National System

H. H. Melanson has been appointed assistant traffic vice-president, Canadian National Railways, with headquarters at Montreal. Announcement of the appointment was made in a circular issued by R. L. Burnap, vice-president in Charge of Traffic, and approved by Sir Henry Thornton. The appointment is effective immediately and the official announcement states that Mr. Melanson will have charge of such matters, and will perform such duties, as may be assigned to him from time to time by the vice-president.

H. H. Melanson brings to his new executive position long railway experience. Descended from Acadians who settled at Port Royal in 1660, he entered the service of the International Railway, at Moncton, N.B., in 1889, being then described as "Assistant to the Junior Clerk" in the mechanical department. Three years later he joined the passenger department of the Intercolonial Railway, and in 1899, was promoted to the position of chief clerk of that department. After becoming general baggage agent, Mr. Melanson was made assistant general passenger agent of the Intercolonial Railway, in 1909, and became general passenger agent in 1913. In 1917, Mr. Melanson was appointed passenger traffic manager of the Canadian Government Railways, and he was made passenger traffic manager of the Canadian National Railways, in 1918. This position he held until his appointment, in 1923, as general passenger traffic manager of the Canadian National Railways.

Mr. Melanson is one of two Canadians who have held the office of president of the American Association of Passenger Officers, which met last year at Jasper Park Lodge during the course of a tour through Western Canada, the other Canadian to have had this honor being Mr. George T. Bell, formerly executive assistant to the traffic vice-president, Canadian National Railways.

Mr. Melanson is the author of a paper on the subject of the Canadian National Railways, which was presented at the meeting of the American Association of Passenger Officers, held at Jasper Park Lodge, Jasper, Alberta, in 1923.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed by the writer for publication. We do not necessarily coincide with views expressed.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates in The Advance are—display, 40¢ per inch for first week and 30¢ for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10¢ per count line. Legal advertising, 15¢ per count line for first week and 10¢ for each succeeding week.

Heard About Town

David Smith, of Hardisty, a former resident of Chinook, is now reliving the terrors of the Bank of Commerce at Hanna.

Theresa, the eight-year-old daughter of Mr. and Mrs. George Connell, was taken to Calgary on Sunday morning. She will receive treatment for her eyes.

The Cereal intermediate hockey team was here on Saturday afternoon and met another defeat the score being Chinook 3, Cereal 2. The game was a good exhibition of hockey.

The Ladies' Card Club met with Mrs. R. D. Vanhook on Tuesday evening. The winner, Mrs. J. G. Connell, received a pretty cup and saucer. The next meeting will be held with Mrs. S. H. Smith.

Ralph Whelan had the misfortune to lose his best horse and to have another badly crippled on Saturday. They had strayed on the C.N.R. right of way and was hit by a freight train. The injured animal may have to be destroyed.

The junior hockey team went to Youngstown on Saturday and played a hard fought game with the boys of that town. Once time was played to break a 3-3 score, and the Youngstown boys were lucky ones, scoring the only goal. The final score was—Youngstown 4, Chinook 3.

During the month of December 54 students of the Garbett Business College, of Calgary, won the McIntosh rapid calculation diploma. We are pleased to report that Miss Marvel Milligan, daughter of Mr. and Mrs. Wm. Milligan, passed eighth in this large class. Congratulations, Marvel.

Weather conditions are much more agreeable this week. After the two months of cold, the mild spell is appreciated. The wind has been taking the snow rapidly the past few days. Spring is not yet here. No doubt the ground hogs saw their shadow on Sunday, so that means we are tucked away underneath winter's blanket for another six weeks.

The Women's Institute met at the home of Mrs. W. S. Lee on Wednesday afternoon with an attendance of 22. The president Mrs. Lee, was in the chair. The regular business was transacted. Mrs. Richard Stewart was appointed the delegate to attend the annual convention, which will be held in Drumheller. Mrs. J. Massey sang a solo, Mrs. O. Nelson gave two recitations and Mrs. W. A. Todd a reading. Mrs. A. V. Youell was joint hostess with Mrs. Lee.

News in Brief

Derry, Ireland, has banned whist drives.

Sir James Barry is writing a new Peter Pan book.

England has an average of 4,000 divorces a year.

Thirty American airplanes are in service in Peru.

France's 1929 prune crop weighed 8,975,000 pounds.

Nearly 80 American airplanes are being used in Mexico.

Reindeer are being shipped from Lapland to the United States.

The Irish Free State is to take an industrial production census.

More than 800,000 tons of rubber were used in the world in 1929.

Drumheller and district was visited by a snow storm on Monday.

Farmers of Italy are using agricultural machinery made in Germany.

Paid attendance during the 10 days of the 1929 Paris auto show was 229,000.

In Calgary during the month of January 68 autos were stolen and 66 recovered.

A new rural mail route has been established out from Big Valley the first of the week.

Mrs. Art Weber, of Cereal, underwent an operation for trouble in Calgary last week.

The difference between a nightgown and an evening dress is two yards in favor of the nightgown.

Plans are now under way for the construction of one of the largest horse race tracks in the world in Mexico City.

Capital represented by the cattle industry of Uruguay now is nearly \$1,375,000,000, or more than half the total national wealth.

Luck means being an early riser, living on a dollar a day if earning only two, minding your own business and letting the other fellow do the same.

Door squeaks may be located in a closed car by driving with each of the four alternately opened. When the noise disappears that is the offending door.

Michael Kennedy, locked in the jail at Drumheller, charged with attempted murder of the chief of police of Hanna, committed suicide by taking strichnine.

Ten million dollars will be spent by the Saskatchewan government on all weather highways this year, the government has announced, and the same amount in 1931.

Hunters and fresh water fishermen in New Jersey expend an average of \$25 a year for guns, ammunition, fishing tackle, clothing, railroad, gasoline, guides, boats, board, etc.

Two car loads of hay have been distributed to help out in the serious situation in which the farmers of Cardross, Sask., find themselves on account of the unaccustomed heavy snow fall. Much loss of stock has been reported.

The average cash income per farm home in the prairie provinces last year was \$2,544, exclusive of the value of seed, feed, meat, vegetables and other commodities produced and retailed by the farmer for his own requirements.

Pastor, J. D. Woollatt; B.A.

CHINOOK CATHOLIC Service Second Sunday Every Month Mass at 8 a.m.

More About Legislature

(Continued from first page) means. Considering these facts, it is likely that the legislature will do no more than define its policy on relief for the unemployed. The speech does not mention redistribution, but a committee is at work already. If an election is called this spring a redistribution measure will have to be passed during the session.

No mention is made of legislation to regulate brokers and stock exchanges. However, the house will certainly take action to control conditions now rocking the financial world of Alberta and Canada. This problem requires co-operation with the other provinces in Canada, but if no act is passed, a statement of policy will probably be made.

The spice of the program is the School Bill. It will be remembered that the bill was introduced experimentally last session and that it raised considerable controversy. Mr. Baker will now bring in a new draft more in accord with public opinion, hoping to have better luck. The U. F. A. has again endorsed the bill, but the trustees last year were almost unanimously against any radical change. An interesting time is expected by all.

It would appear, then, that this fourth session of the sixth legislature of Alberta, is a momentous one, and that our representatives will well earn their indemnities.

Election rumors are flying about the streets of the capital and the Liberals have already begun local organization. The Tories have met in provincial convention and have a new leader: D. M. Duggan, in succession to A. A. McGillivray.

Mrs. J. Long, of Cereal, is visiting at the home of her parents, Mr. and Mrs. A. E. Robers, for two days this week.

Colholme Collections

Teddy Whatley spent the week end with John Allen.

Miss J. G. Morrison, R.N., i in Cereal this week receiving medical treatment.

Born to Mr. and Mrs. D. Schmidt, of Colholme, on Monday, January 27, a son.

Mr. and Mrs. Leftwick and family visited on Saturday evening at the home of S. M. Brown.

Mr. and Mrs. C. Bow and family and Mr. and Mrs. W. W. Wilson spent Saturday evening at the Sam Brown home.

The next meeting of the Collholme U.F.A. will be held in the Clover Leaf school on February 12 at 2 o'clock. A program is being arranged by the social committee to be held after the business meeting. Lunch will be served. Everybody welcome.

The Collholme U.F.A. held a meeting in the Collholme school on Saturday afternoon. After the roll call and reading of the correspondence, the delegate to the annual convention, S. W. Warren, very ably gave an interesting report on the convention recently held in Calgary. The attendance was good.

Mrs. A. Watson

Mrs. Agnes Watson, aged 65 years, 1520 Eleventh avenue west, Calgary, died Monday morning in a local hospital. She leaves her husband, Thomas F., three daughters, Mrs. R. M. Fee, of Dexter, Michigan; Mrs. A. G. Robinson, Renville, Alberta; and Miss Mabel, at home; one son, Tom, also at home, and two brothers and two sisters in England.

Mrs. Watson came from England in 1913 and farmed in Chinook district until 1921. She had lived in Calgary for the past four and a half years.

CROCUS LODGE, No. 115, A.F. & A.M. meets at 8 p.m. on Wednesday or after full moon. Visiting brother cordially welcomed.
